System Engineer

Tata Consultancy Services(TCS)

Full-time | Oct 2021 to Present (4 years 9 months)

3 Months Notice Period

Full Stack Developer with over 4 years of experience in designing and developing scalable Java-based applications, specializing in Spring Boot and Microservices. Experienced in building backend APIs, integrating databases using best practices, and implementing robust workflows for internal enterprise platforms. Skilled in automation, unit testing with JUnit, and API documentation with Swagger. Proficient in working with cloud databases (Azure SQL), Kafka-based service communication, and delivering seamless user experiences. Continuously upskilling in React for frontend development. Strong problem-solving skills with a track record of delivering high-quality solutions in fast-paced enterprise environments.

Top 5 key skills:Java, Spring, Spring Boot, React.js, HTML, CSS

System Engineer

Tata Consultancy Services(TCS)

Full-time | Oct 2021 to Oct 2021 (1 month)

Working as a Java Backend Developer building REST APIs using Spring Boot for Walmart internal apps. Also contributing to frontend development using React, handling UI tasks and API integrations. Collaborating with cross-functional teams in an Agile environment.

Profile summary

Passionate and dedicated Java Backend Developer with 4 years of experience in building scalable backend systems using Java, Spring Boot, and microservices architecture. Proficient in designing and implementing RESTful APIs and integrating with relational databases like MySQL and H2. Demonstrated ability to understand complex business requirements and convert them into robust technical solutions. Currently enhancing full-stack capabilities by learning modern frontend technologies, including React, HTML, and CSS. Committed to continuous learning, clean code practices, and delivering production-ready applications with a focus on performance and maintainability.
