System Engineer - Backend Developer

Tata Consultancy Services, Chennai

Oct 2021 - Present (4 Years, 9 Months)

Working as a Backend / Full Stack Developer at Tata Consultancy Services with 4+ years of experience in Java, Spring Boot, and Microservices.

Primarily involved in designing and developing RESTful APIs for largescale enterprise applications for Walmart internal platforms, including event management, idea submission, evaluation workflows, and prototype tracking.

Worked on microservices communication using Kafka and handled database operations using Azure SQL and SQL Server with optimized queries and best practices.

Contributed to API documentation using Swagger and wrote unit test cases using JUnit and Mockito. Provided frontend support using React (basic) and WordPress.

Previously worked on automation testing for Comcast NBC Universal using Selenium and Jenkins.

Actively involved in debugging production issues, resolving Jira tickets, and collaborating with crossfunctional teams to deliver reliable and scalable solutions.
